Minutes of the General Assembly on 12\textsuperscript{th} December, 2019

Minute taker: Colin Finck

The General Assembly of the Association “ReactOS Deutschland e.V.” took place in the internet (SSL secured IRC server) on 12\textsuperscript{th} December, 2019 at 19:00 (local German time).

Attendant members

- Matthias Kupfer (President of the Association)
- Daniel Reimer (Vice President of the Association)
- Colin Finck (Treasurer)
- Thomas Faber
- Mark Jansen
- Amine Khaldi
- Timo Kreuzer

Summary of the decisions

- The Board has been discharged of its responsibilities.
- In order to prepare for Google Summer of Code 2020, a “Google Summer of Code 2020 Ideas” wiki page shall already be created now. Such a task list would also help to find suitable candidates for paid development. To find such developers, it was also discussed to contact other open-source organizations like FOSSASIA.
- The regular meetings with all ReactOS members are going to be reinstated on 30\textsuperscript{th} January, 2020. They will now be scheduled bi-monthly.

The original wordings of all attendant members can be read in the attached IRC Log.

Aachen, 12\textsuperscript{th} December, 2019

For the correctness of the minutes

- Annual Report 2018
We promote at events like fosdem, and we educate both on mattermost as well as on github and sometimes in person on events.

I don't want to do this today, I want to make all aware, that such things might be helpful or necessary in future.

we lack 2 people today.

It’s a fact we have to reduce our cash at any price (nice pun) ;-)

Colin_Finck: I agree.

should be rechecked multiple times before a drastic change like this is done.

My information is, that we can find an individual agreement and a new one for our foundation is not necessary.

If we really buy something with real invoice aso, it's not that difficult.

the money has to cover ongoing activities, it's not allowed to save that amount of money over years.

the board is taking care of that issue in connection with a tax consultant.

and we can lose our tax-deductible status.

As you may have noticed, the money pile grows and grows.

For getting the German time on that day, add one hour.

we're only piling up money.

Evil mIRC... I need a + with the port to have SSL...

We educate ppl, but for

I'm not sure if I'm allowed to do so publicly, I vote to discharge the responsibilities of the board.

Our reason for charity doesn't actually match our activities, so financial authorities might think it's fake overall.

The worst case scenario I have in mind is: We hire a developer for some tasks.

Even it's not the ideal one.

None from me.

None from me.

None from me.

None from me.

None from me.

None from me.

None from me.

It’s my duty to keep you informed of that. The worst case scenario I have in mind is: We hire a developer for some tasks.

In addition, the money has to cover ongoing activities, it’s not allowed to save that amount of money over years.

I already have asked an official person at the financial authorities and we overcome.

I'm not sure if I'm allowed to do so publicly, I vote to discharge the responsibilities of the board.

The worst case scenario I have in mind is: We hire a developer for some tasks.

I am fine if we have a vote about changing the foundation charitable activity if deemed necessary by authorities. But this should be restricted multiple times before a drastic change like this is done: KDE e.V. and The Document Foundation have similar activities listed.

The charter, presentation of ReactOS at open-source events and the annual ReactOS Hackfest, which matches our “promotion of research and education” activity in the charter.
<Colin_Finck> ah, I thought that was the vote you were referring to on 19:13
<Matthias_Kupfer> no, the vote was for discharging, but anyway
<Colin_Finck> ok, then let's proceed here. Further questions regarding our status with the tax consultants and the possibly necessary changes to our charter can be clarified on Mattermost after the official part is done
<Matthias_Kupfer> So, having said this we can move to the next point
<Colin_Finck> 2nd point on the agenda is discharging the board members
<Matthias_Kupfer> shall I set up the vote?
<Matthias_Kupfer> It's like every year, we ask you to discharge the board for the past year. It's GDC or something else.
<Colin_Finck> please start the vote.
<Matthias_Kupfer> I'm afraid we have to wait 5 minutes for the result, because of Thomas absence
<VoteBot> Colin_Finck has set up a vote and I'm asking all participating members in private messages now.
<VoteBot> Excluded from voting:
<VoteBot> Colin_Finck
<VoteBot> Matthias_Kupfer
<Matthias_Kupfer> so, it's almost over.
<VoteBot> The vote is over. Here are the results!
<VoteBot> Question: Do you agree with discharging the responsibilities of the Board? (in German: "Sprechen Sie dem Vorstand Entlastung aus?")
<VoteBot> Answers:
<VoteBot> Abstention - 1 votes
<VoteBot> Yes - 3 votes
<VoteBot> No - 0 votes
<VoteBot> Total number of votes: 4
<VoteBot> For the record: Thomas_Faber has publicly voted to discharge the responsibilities of the Board on 19:12, so the "Abstention" vote becomes a "Yes"
<Colin_Finck> Which means, final results are:
<Colin_Finck> Abstention - 0 votes
<Colin_Finck> Yes - 4 votes
<Colin_Finck> No - 0 votes
<Colin_Finck> Thank you very much!
<Matthias_Kupfer> okay, thanks for your trust
<Daniel_Reimer> Thanks for the discharge. As always I feel that I did not do much and you all keep the ship on course, but thanks for the support.
<Matthias_Kupfer> Let's move on to the next point: present and future activities
<Matthias_Kupfer> the past activities are always the same like mentioned in the annual report and I think we can continue those things without further discussions.
<Timo_Kreuzer> What do you refer to specifically?
<Matthias_Kupfer> attending events
<Colin_Finck> participate google summer of code
<Matthias_Kupfer> hackfest aso.
<Colin_Finck> with FOSDEM 2020 being just in the pipeline
<Matthias_Kupfer> I think we should attend more events and we should be prepared of losing an event, this year it needs my personal force to keep Ch emanci Linux Days
<Matthias_Kupfer> because they have a space problem and we don't perfectly fit in
<Matthias_Kupfer> I'll do my best in future, but be aware of this.
<Timo_Kreuzer> Regarding Hackfest, there were suggestions to do it in Belarus instead of Berlin. I would support that. Would that be an option?
<Matthias_Kupfer> So, the registration is open, Daniel_Reimer please don't forget to register.
<Timo_Kreuzer> What's about visa issues?
<Colin_Finck> Timo_Kreuzer: Belarus was the first idea, St. Petersburg was the second one now that they also have eased visa regulations for 30 days. We'll have to check where we have more people to organize things locally.
<Colin_Finck> The issue is politically the most problematic region in Europe, just my idea.
<Timo_Kreuzer> We could rent an AirBNB and be done. It's pretty cheap over there.
<Timo_Kreuzer> Belarus is visa free for both EU and Russia
<Colin_Finck> however only via Minsk airport. Better be aware of that now.
<Matthias_Kupfer> okay, I'm a little bit worried, but don't make it depend on me.
<Colin_Finck> (I'm planning a private train trip next year, which will also cross Belarus and will certainly need a visa)
<Matthias_Kupfer> so, we would need a visa.
<Colin_Finck> If you come by train, then yes. If you come via Minsk airport, you can get there visa free.
<Colin_Finck> (For 30 days)
<Matthias_Kupfer> I'm more worried now, anyway.
<Colin_Finck> other plans and ideas?
<Colin_Finck> anyway, having organized the last few Hackfests in Berlin, I'm not opposed to a wholly different location for 2020. It just needs someone else to do the local organization then.
<Colin_Finck> I'll ask Victor Perevertkin, he was also a friend of the Minsk idea.
<Timo_Kreuzer> okay
<Matthias_Kupfer> okay, so let's postpone the decision on that, are there other suitable regions?
<Colin_Finck> Matthias_Kupfer: let me shortly write something up
<Matthias_Kupfer> okay
<Colin_Finck> regarding other ideas.
<Colin_Finck> In the meantime, you guys are free to suggest other suitable regions for a Hackfest
<Daniel_Reimer> Well, over here? Not much to see in Lower Franconia and I would have to check for a bigger location, unless we wanna do hackfest in my living room ^^ But if nothing else comes up, it is possible here.
<Matthias_Kupfer> regarding our money pile, I thought about developing a small notebook with working hardware for reactos and selling bundled with free operating system.
<Thomas_Faber> (Back)
<Matthias_Kupfer> For windows people which don't want to use windows but have some programs to run.
<Mark_Jansen> maybe we could discount merchandise or cover shipping costs.
<Matthias_Kupfer> and need a windows system for whatever reason.
<Daniel_Reimer> I like the idea.
<Amine_Khaldi> has quit the server (Connection reset by peer)
<Timo_Kreuzer> Matthias_Kupfer: I don't think we are anywhere close to consider that. And selling it would increase our money pile.
<Timo_Kreuzer> "Close in the sense of ReactOS stability"
<Matthias_Kupfer> we can select supported hardware first, okay it was just an idea, the developing cost will considerable minimize our money pile.
<Colin_Finck> Victor Perevertkin and we have been to Google Summer of Code Mentor Summit in Munich this year and met many interesting people. Next to what I already reported on ROS-dev, I also talked to some Indian mentors.
<Colin_Finck> They are well aware of the problem of vastly different quality but you can get when hiring software engineers from India (no matter if it's GSoC or something else), however, those mentors referred me to FOSSASIA, a non-profit organization with a good connection to developers in Asia. It sounds like it's possible to basically go there with a budget and objectives and they can find the right developers for us.
<Colin_Finck> Our budget could actually mean a pretty good pay for these people in these countries.
<Mark_Jansen> so they would handle the biggest workload of hiring / searching people?
<Colin_Finck> I still didn't find the time to speak to anyone from FOSSASIA. But I also can't do that alone. If we hire anyone from
outside, these people also need basic training and mentorship in the beginning, just like we do for GSoC.

Colin_Finck: Mark_Jansen: The mentors I talked to made it sound like that. But as I say, I still have to speak to someone from FOSSASIA actually

Mark_Jansen: Another idea would be to pay someone to write press releases / articles. I think we have many enthusiasts that do not have the technical know-how to contribute code, but they might want to contribute in other ways.

Colin_Finck: Mark_Jansen: I think if we want a good technical outcome, we need some technical mentors.

Mark_Jansen: We always went for 19:00 UTC in the past.

Daniel_Reimer: Doable. Unless there is an emergency again...

Mark_Jansen: works for me

Colin_Finck: I actually mean short meeting. Let's use the upcoming events to do little steps forward,

Matthias_Kupfer: Colin_Finck: but this will not take an hour.

Colin_Finck: we can of course use our Mini-Hackfest on FOSDEM's Saturday to make a list.

Timo_Kreuzer: Rather professional developers. But I expect that we'll likely get people that just graduated from university and are looking for first jobs. I expect long-term professional developers to eventually end up with a job at a bigger organization rather than going from gig to gig.

Matthias_Kupfer: Colin_Finck: Okay, which means it would be independent from time (vacations).

Matthias_Kupfer: What are the next steps?

Timo_Kreuzer: Matthias_Kupfer: Yeah, it's probably the easiest if someone takes https://reactos.org/wiki/Google_Summer_of_Code_2019_Ideas, copies it to "Google Summer of Code 2020 Ideas", cleans it up, and adds new stuff

Colin_Finck: This could serve as a list for both GSoC and potential jobs then.

Mark_Jansen: And another idea would be to pay someone to contact FOSSASIA in near future?

Colin_Finck: When I have a list to show then, I can do that.

If somebody has the idea to move the meeting to January then. Unless Timo_Kreuzer prefers a meeting next week to push for his Hackfest-over-Christmas-holidays idea ;)

Matthias_Kupfer: Colin_Finck: Nobody had called for our former monthly meetings in a long time, so I didn't reactivate them. Could do anytime though.

Colin_Finck: Mark_Jansen: This seems like a good idea to move this forward

Matthias_Kupfer: Colin_Finck: Short meetings means less then an hour.

Colin_Finck: Colin_Finck: Mark_Jansen: you mean reactivating monthly meetings?

Mark_Jansen: Once in 2 months.

Daniel_Reimer: Meetings are needed. RoseWB waits for fixes, the list and more stuff. At least every 3 months.

Colin_Finck: ok.

Timo_Kreuzer: I guess we will figure something out.

Matthias_Kupfer: Timo_Kreuzer: If nobody volunteers today to manage that, I'm afraid nothing would happen before FOSDEM.

Colin_Finck: we can of course use our Mini-Hackfest on FOSDEM's Saturday to make a list.

Colin_Finck: But would be great if we still got things done outside of Hackfests ;)

Matthias_Kupfer: Colin_Finck: let's use the upcoming events to do little steps forward,

Timo_Kreuzer: I guess we will figure something out.

Matthias_Kupfer: 1. core developers (kernel)

Matthias_Kupfer: 2. application developers

Timo_Kreuzer: https://reactos.org/wiki/Google_Summer_of_Code_2019_Ideas already has a separation by category, and I also think it would be beneficial if we had a Difficulty label. Maybe it makes more sense to manage that entire list in JIRA anyway ;)

Matthias_Kupfer: Timo_Kreuzer: 3. tester, artwork, translations and stuff like this

Matthias_Kupfer: Timo_Kreuzer: I guess we will figure something out.

Matthias_Kupfer: Timo_Kreuzer: 4. administrative supporting tasks, wiki, merchandise, articles, promotions, support on fairs and events

Timo_Kreuzer: Colin_Finck: Timo_Kreuzer: If nobody volunteers today to manage that, I'm afraid nothing would happen before FOSDEM.

Mark_Jansen: Colin_Finck: okay, so then let's move on, has anyone further topics to come up with?

Timo_Kreuzer: One additional remark:

Timo_Kreuzer: For paid developers we have different task requirements (i.e., less), so we can use tasks like "Fix winestests" or "clean up the wiki"

Timo_Kreuzer: Colin_Finck: I think we need more than 2 groups, first guess:

Timo_Kreuzer: Matthias_Kupfer: 1. core developers (kernel)

Timo_Kreuzer: 2. application developers

Timo_Kreuzer: Colin_Finck: Timo_Kreuzer: https://reactos.org/wiki/Google_Summer_of_Code_2019_Ideas has a separation by category, and I also think it would be beneficial if we had a Difficulty label. Maybe it makes more sense to manage that entire list in JIRA anyway ;)

Matthias_Kupfer: Timo_Kreuzer: 3. tester, artwork, translations and stuff like this

Timo_Kreuzer: I guess we will figure something out.

Timo_Kreuzer: Matthias_Kupfer: 4. administrative supporting tasks, wiki, merchandise, articles, promotions, support on fairs and events

Timo_Kreuzer: Colin_Finck: Timo_Kreuzer: If nobody volunteers today to manage that, I'm afraid nothing would happen before FOSDEM.

Colin_Finck: we can of course use our Mini-Hackfest on FOSDEM's Saturday to make a list.

Colin_Finck: But would be great if we still got things done outside of Hackfests ;)

Matthias_Kupfer: Colin_Finck: let's use the upcoming events to do little steps forward.

Colin_Finck: Colin_Finck: Nobody had called for our former monthly meetings in a long time, so I didn't reactivate them. Could do anytime though.

Matthias_Kupfer: Colin_Finck: okay, just an idea.

Mark_Jansen: This seems like a good idea to move this forward

Matthias_Kupfer: Colin_Finck: Short meetings means less then an hour.

Colin_Finck: Colin_Finck: Mark_Jansen: you mean reactivating monthly meetings?

Mark_Jansen: Once in 2 months.

Daniel_Reimer: Meetings are needed. RoseWB waits for fixes, the list and more stuff. At least every 3 months.

Colin_Finck: ok.

Timo_Kreuzer: I agree.

Matthias_Kupfer: But please a small group of people, otherwise it will take considerably longer.

Mark_Jansen: If you need a volunteer, you have to draw from a large pool of people ;)

Matthias_Kupfer: Colin_Finck: okay, let's start with 2 months to end up with one in 3 months ;)

Daniel_Reimer: Good ^^

Daniel_Reimer: Rtw, Matthias_Kupfer registration for CLT is out.

Matthias_Kupfer: Colin_Finck: Should we setup a kind of doodle to schedule the best date and time?

Matthias_Kupfer: Colin_Finck: I think first one should be in January then. Unless Timo_Kreuzer prefers a meeting next week to push for his Hackfest-over-Christmas-holidays idea ;)

Matthias_Kupfer: or are there preferred dates already known (day of week and time)?

Mark_Jansen: or something like the first or last thursday of even / odd month?

Matthias_Kupfer: Colin_Finck: okay, last thursday of even month sounds fine to me

Matthias_Kupfer: odd month sounds a little bit odd

Timo_Kreuzer: I'd prefer first Thursday.

Mark_Jansen: odd if we start in January?

Colin_Finck: Matthias_Kupfer: My idea would be to reactivate the monthly meetings on Mattermost we had until around a year ago. With all ReactOS members, not just e.V.-related.

Colin_Finck: Colin_Finck: but this will not take an hour.

Matthias_Kupfer: I actually mean short meeting.

Mark_Jansen: Maybe if we start in January?

Colin_Finck: If you have a clear agenda, it can be done in an hour. We had that already

Colin_Finck: But for non-agenda topics, people can continue to discuss on the Development channel afterwards

Matthias_Kupfer: Colin_Finck: okay, last thursday in odd month, starting in January (2020-01-30)

Daniel_Reimer: +1

Timo_Kreuzer: I'm fine with that.

Mark_Jansen: works for me.

Colin_Finck: Colin_Finck: +1 (I'm still on holidays on the first Thursday of January ;P)

Colin_Finck: Colin_Finck: Okay ok? ok okay?

Daniel_Reimer: Doable. Unless there is an emergency again...

Colin_Finck: We always went for 19:00 UTC in the past.

Timo_Kreuzer: remember that this is for all devs, not only for us. We should just keep the old time, IRC we voted on that.

Colin_Finck: Which would be 20:00 in our CET/GMT+1 timezone

Matthias_Kupfer: Colin_Finck: okay so 19:00 UTC (20:00 CET)
Timo_Kreuzer: Exactly. Not sure if we still all agree on what we voted on back then, but let's start with that.

better. More possible fixing time frame after work is over (over in theory)

Matthias_Kupfer: finally has anyone moved to a new residence and we have to update the new address?

did :)

And I already updated the address in the system

Matthias_Kupfer: Colin_Finck: which place/city now?

still Aachen, but different street

okay, anyone else?

the new address is already on the last paper we sent to the registration courts in the beginning of 2019

no

No changes here and none planned too

Amine_Khaldi: you are still alive?

I am hoping to move in 2020, but as of yet, no change

okay, no changes so far, then the official part is over

thanks for you time, we will see you on January (at least)

in Mattermost

so I’ll shut down the IRC Server now and we can all move to Mattermost

think it’s time to finally book an airbnb for FOSDEM ;)

Daniel_Reimer has quit the server (End of file)
Annual Report 2018

As stipulated in the Articles of Association of ReactOS Deutschland e.V., the Annual Report gives an overview of the work of the Association in the year 2018. It is separated into Activities, Outlook, and Finances. The primary purpose of the Association lies in the support of the ReactOS Project. In 2018, the main tasks were:

- Organizing the ReactOS Hackfest 2018
- Organizing the participation in Google Summer of Code
- Presenting the project on popular exhibitions/events

Activities

The following annual activities, which directly contribute to the Association’s purpose, are not presented in detail. These were in particular:

- Continued development on the operating system ReactOS and related components (like RosBE), also by non-members
- Receiving donations and managing the collected funds
- Accounting and managing the members

During the year of 2018, the ReactOS Project continued to deliver on the reestablished 3-month release schedule. Three ReactOS versions were published this year and guaranteed a steady inflow of donations, even surpassing the good result from 2017.

Part of these funds were used to continue a scholarship from the previous year. It ran until end of March, when the student could no longer fulfill the requirements and the scholarship had to be terminated. Paid development on ReactOS also occurred in February in the form of contract work on the USB stack. ReactOS Deutschland e.V. has been seeking for additional eligible students and freelancers throughout the rest of the year. However, due to a lack of suitable candidates, no further scholarships and contracts have been awarded in 2018.

Yet another time, members of the ReactOS Project presented the operating system at popular Open-Source exhibitions in 2018, such as the FOSDEM in Brussels in February and the Chemnitzer Linux-Tage in Chemnitz in March. This year, Association member Pierre Schweitzer also gave a talk about ReactOS at the RMLL in Strasbourg in July. As every year, ReactOS Deutschland e.V. supported all presentations by providing merchandising material and covering the travelling expenses.
From May through September, the ReactOS Project could again participate in the yearly Google Summer of Code event, where Google pays university students to work on selected Open-Source projects. In contrast to the previous year, only a single student qualified for one of the available tasks. Fortunately, he could be mentored by four ReactOS developers, thereby successfully completing his task and becoming a member of the ReactOS development team afterwards. ReactOS Deutschland e.V. was awarded the sum of $3200 for successfully mentoring him and sending up to two people to the Google Summer of Code Mentor Summit in Sunnyvale, California. Association member Colin Finck used that opportunity in October to exchange experiences with fellow Open-Source projects and gain insights on how to improve our future Summer of Code participations.

As already planned in 2017, ReactOS Deutschland e.V. organized another ReactOS Hackfest in 2018, this time taking place from 16th to 21st August in Berlin. The room was generously provided for free by IN-Berlin e.V., which has a strong track record of supporting similar conferences from like-minded Open-Source projects. As such, the booking was very straightforward and the room came with all amenities required for the event. ReactOS Deutschland e.V. only had to cover the travel expenses of some attendees. All in all, the ReactOS Hackfest 2018 in Berlin was received very well and we are looking forward to the next Hackfest there!

The ReactOS infrastructure stayed largely unchanged until November, when two long-time dedicated servers were replaced by a fleet of rented virtual machines and a dedicated storage system. In contrast to the previous setup, these virtual machines operate independent of one another, so that a failure of one service can no longer adversely affect other services. To further increase reliability and decentralization, the virtual machines are also spread between multiple European locations. As a side effect of the migration, the ReactOS web services are again reachable from certain countries, where they became victims of bulk IP bans. Due to the ever-decreasing price of server hosting, the better infrastructure comes at roughly the same monthly costs, but requires less maintenance.

By the end of the year, ReactOS Deutschland e.V. had its annual General Assembly. Apart from discharging the responsibilities of the Board and the usual presentation of all current and upcoming activities, the Articles of Association have been changed to add a fourth Board member. Based on his successful handling of various project matters in the past, long-time ReactOS member Pierre Schweitzer has been elected on the additional Vice President position, enabling ReactOS Deutschland e.V. to better represent the project internationally.

**Outlook**

ReactOS Deutschland e.V. will continue to support the ReactOS Project in 2019. Another scholarship is already planned and due to be awarded in March. Apart from that, expect the Association to also manage donations, support ReactOS’ participation at popular Open-Source events, and maintain the ReactOS infrastructure in the next year. The ReactOS Hackfest 2019 is already planned and likely going to happen at the same location in Berlin around August.

Allocation of reserves

Due to the positive development of finances within the last 3 years, ReactOS Deutschland e.V. is legally obliged to provide a list detailing the allocation of reserves. This is why the Annual Report contains this section for the first time.

From the final balance on 2018-12-31, the following funds are allocated to reserves for expenses within the next 3 years:

- Scholarships and other forms of paid development: 23,484.00 €
- Advertisement costs: 5,000.00 €
- Investments in server infrastructure: 3,000.00 €
- Legal consultation: 3,000.00 €
- Periodically recurring infrastructure expenses: 2,192.00 €
- Organization and travel expenses of ReactOS Hackfests: 2,000.00 €
- Travel expenses for Open-Source exhibitions: 1,600.00 €
